

Pediatric Urology—See UCSF Children’s Hospital Section

Urologists at UCSF Medical Center provide surgical diagnosis and expert treatment of diseases of the urinary tract, including urologic cancers, male sexual dysfunction, urinary incontinence, pelvic pain, urinary stone disease, male infertility, prostate disease and urinary tract reconstruction. Prostate imaging and biopsy are offered, as are cryosurgery and radioactive seed implantation for localized cancers. New treatment techniques are available for patients with a variety of disorders.

Peter R. Carroll, MD
 Chair, Department of Urology
 (415) 353-7098
